

Environmental Policy

Magal AWT Top Level management are committed to implementing the Magal AWT Environmental Policy through personal commitment to, and accountability for, the effectiveness of the Environmental Management System. Such top-level management governance shall include but is not limited to;

- **Promotion of risk awareness to prevent pollution incidents**
- **Adherence to compliance obligations that relate to its environmental aspects**
- **Continually improve the environmental performance of the business, utilising appropriate problem solving tools and techniques**
- **Promote a culture of personal accountability for the environment and responsibility for the environmental aspects, throughout the business**
- **Provide adequate training and resources to support and develop the environmental management system, in order to achieve the intended outcomes**

The company's environmental management system shall apply to all of the activities, products and services of Magal AWT.

The environmental management system shall support this policy and comply with the standard ISO 14001 2015.

The environmental management system shall support the business plan by setting strategic objectives and targets for continual improvement of environmental performance and monitoring progress towards achievement of those objectives.

The principal areas in which the Company has control and influence over environmental impact shall include but are not limited to:

- The design of automotive products and the environmental performance of those designs.
- The use of environmental selection criteria when nominating suppliers of materials, processes and services.
- Efficiency in the use of energy in the manufacture of our products and to provide a framework for setting & monitoring environmental objectives
- Management of waste.

The elements, leadership and governance of the Environmental Management System are described in the document EMP01 Environmental Performance.
